Public procurement [1]

Purchase of Durable/Consumable goods, services, external experts, promotion

BACKGROUND INFORMATION

AMOUNTS REGULATED BY EU - NATION/REGIONAL THRESHOLDS

According to the value of the **contract** to be awarded, **EU and nation/regional public procurement rules are to be followed strictly**: any goods, both durable and consumable, external expertise and service contract must comply with public procurement rules and related administrative procedures in order to make the expenditure eligible for funding

The stricter rule applies

Public procurement [2]

Purchase of Durable/Consumable goods, services, external experts, promotion

MED CONTEXT

Principles of **concurrence, equal treatment, transparency and traceability** shall be respected thus, in the context of MED Programme, for **amounts lower** than the ones fixed by national/regional rules for the purchase of goods, both durable and consumable, external expertise and service, project partners are warmly requested to set up **procedures of simplified selection**

Example:

Catering for a project's conference: request at least 3 offers from 3 different providers before selecting one

VAT

- ✓ VAT does not constitute eligible expenditure unless it is genuinely and definitely borne by the partner and thus cannot be recovered
- ✓ VAT which is recoverable by whatever means cannot be considered as eligible
- ✓ First Level Controllers will have to confirm if the VAT has been really borne by the controlled project partner: check grid annexed to the certification of expenditures

Ineligible expenditures

- ✓ Representation expenditures (e.g. presents, flowers, etc.)
- ✓ Interest on debt
- ✓ Fines
- ✓ Financial penalties
- ✓ Expenditure on legal disputes
- ✓ Exchange losses
- ✓ Expenditures held outside the eligible period
- ✓ Not supported by the relevant public procurement procedures
- ✓ Lump sum, general estimations, unjustified calculations
- ✓ VAT which is recoverable
- ✓ Not justified by project's activities/objectives
- ✓ Not supported by relevant documentation

Revenues

Examples:

- Sale of products
- Sale of merchandise
- Tuition Fees
- Conference Fees
- Services against payment

Control:

- Generation of revenues will be subject to control during certification of expenditure

Deduction:

- If a project generates revenues, the generated net revenue must be deducted from eligible costs in full or pro-rata depending on whether it was generated entirely or only partly by the co-financed operation

Shared costs

Suggestion: to be avoided as

- Double counting
- Ineligibility at the source: loss of funds by all partners
- Costs are subject to double involvement of controllers: also by controller of contributing partner

Principles to be kept in mind:

- Apply only if shared costs cannot be avoided
- Partnership Agreement: foresee a transparent, fair and equitable method to share common cost. Check it with JTS/NCP/FLC
- Limit the shared costs to budget lines “external expertise” and “services”
- Evidence must be provided to the FLC of the contributing partners that the shared costs refer to eligible expenditure certified by the controller of the partners incurring the costs

Contract asap your project officer to let him/her to know if your project foresees shared cost

Decommittment

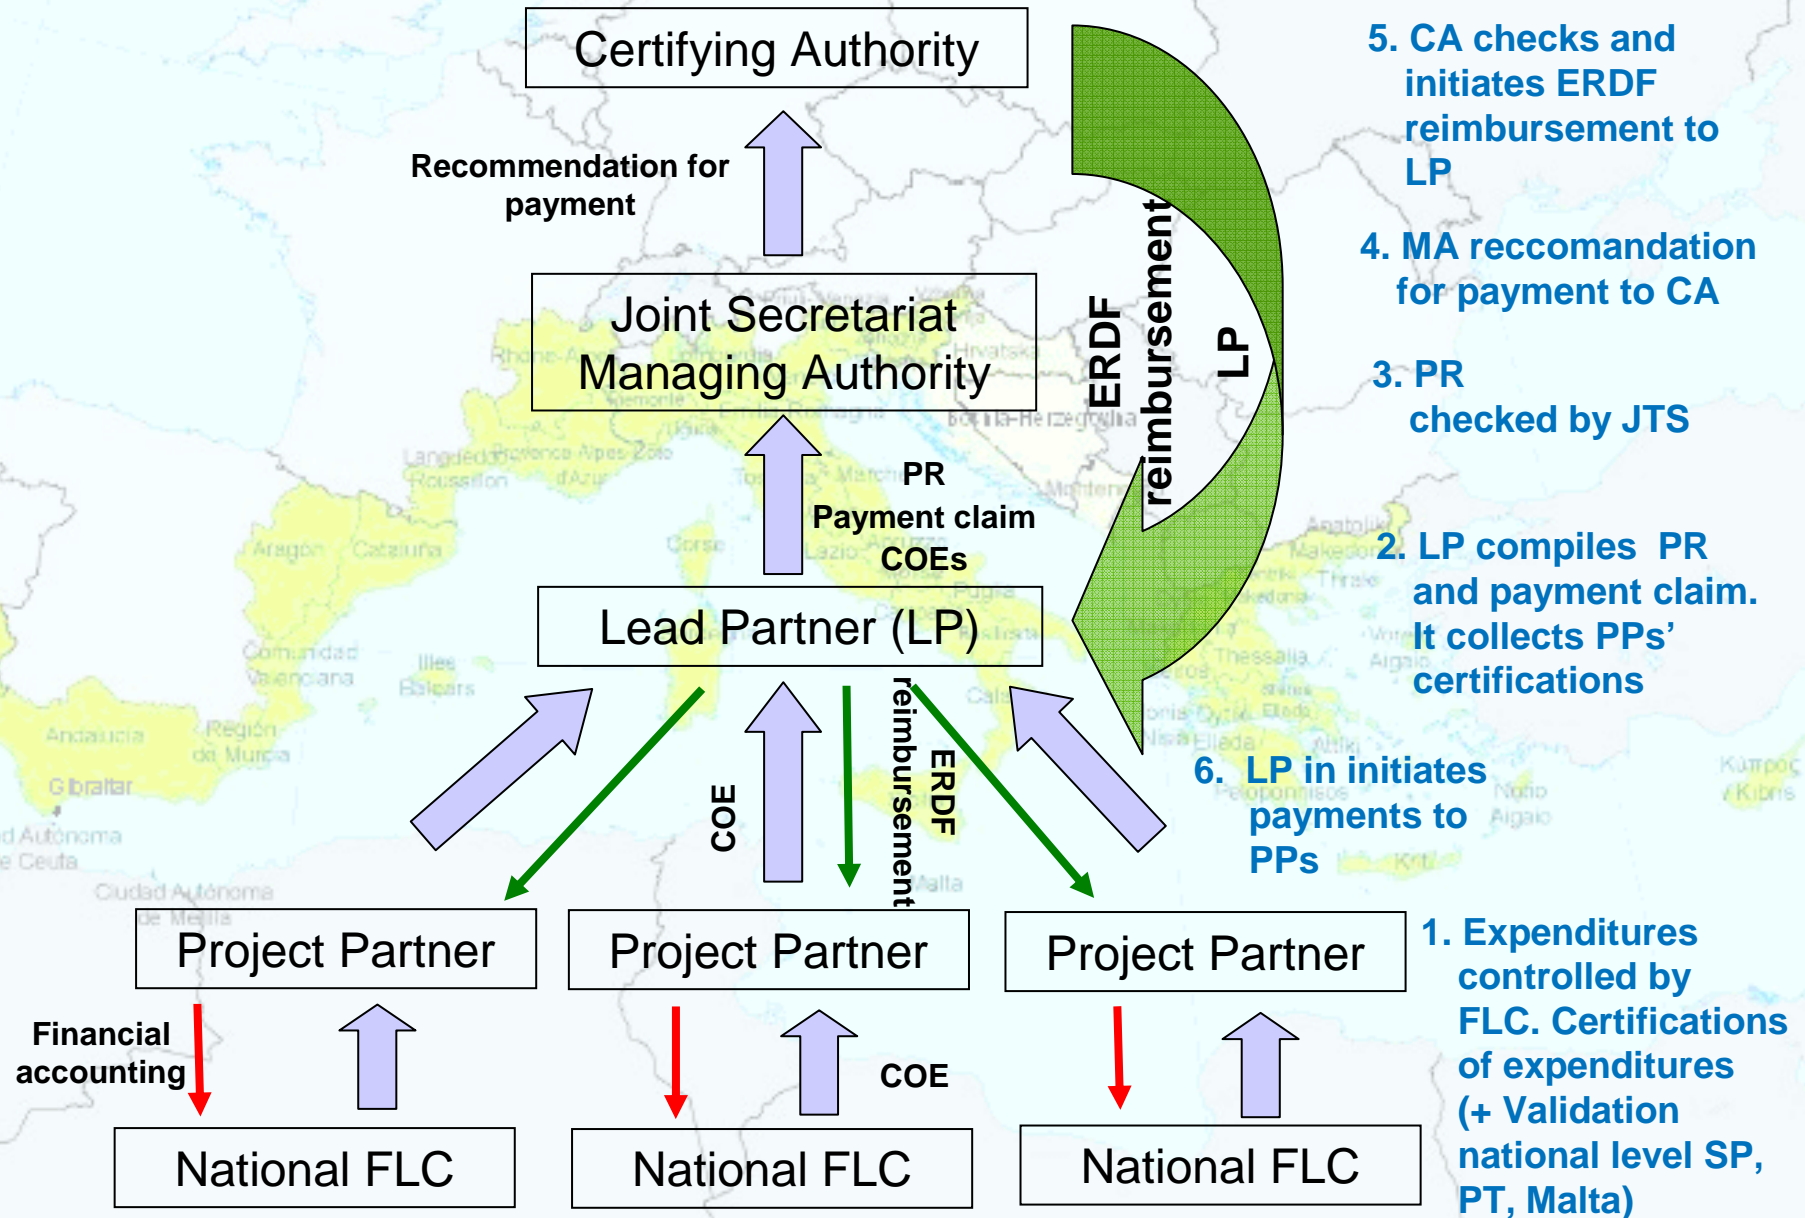

- ✓ European Union will automatically decommit any part of a budget commitment of an Operational Programme that has not been used by 31 December
 - of the third year following the year of budget commitment: for MED Programme the rule applies starting from 2010
- ✓ Applies on Programme level but since the Programme consists of projects, any loss resulting from projects failing to achieve their yearly spending targets risks being passed on to these projects

Please respect the ERDF expenditure commitment fixed at table art. 3.3 of the subsidy contract
